

Pumping & Treatment Solutions

Our Unique Offering

EPS Group is a wet infrastructure specialist with extensive experience in the design, supply, installation and commissioning of water and wastewater pumping and treatment solutions for our clients.

Working in partnership with our clients in the commercial and industrial sectors, EPS Group offers a broad range of services including water treatment technologies, wastewater treatment technologies and bespoke pumping solutions.

Utilising our in-house design and manufacturing facility, EPS Group can also supply, deliver and commission bespoke, off-site assemblies through the application of DfMA engineering services, ensuring client plant downtime is minimised.

EPS Group also offers leading after-sales service support including asset service support and asset optimisation services tailored to meet client specific requirements.

➤ Pumping Control Systems

➤ Energy Efficiency Solutions

Pumping & Treatment Solutions

About EPS Group

EPS Group is a specialist wet infrastructure support services group of companies operating across the Republic of Ireland, the UK & globally. It is one of the few genuine end-to-end service providers in the global water sector.

Founded upon 51 years of experience, EPS has grown from a modest electrical and pumping services business into an innovative, product and service provider, now focused upon the water, wastewater and clean technology sectors.

EPS has invested significantly over the years to ensure that our processes, procedures and standards meet or exceed necessary benchmarks of best practice and statutory codes. This has culminated in the company being awarded a wide range of international standards & accreditations.

EPS Group also offers leading after-sales service support including bespoke asset service support and asset optimisation services.
