

**EPS has been delivering cooling water solutions for data centres across Europe since 2012. To date, we have completed over 20 projects.**

### Completed Projects

- › Dublin - 6
- › Frankfurt - 4
- › Amsterdam - 3
- › Denmark - 3
- › Sweden - 1
- › Hamburg - 1
- › London - 1

## Our Design Expertise

We offer full end-to-end turnkey project delivery including:

- Optimum selection of most suitable water treatment technologies
- Water storage & disinfection - due diligence in relation to disinfection codes of practice
- Compliance to water standards across EU
- Sustainability of our cooling water solutions
- Strategic engineering, resilience & duty of care
- Operations for the entire life cycle

## Water Reuse/Recovery

Due to our experience in the water sector, we are vastly experienced in water recovery solutions; customer ROI; closing the water cycle.

We have a proven track record in providing specific water recovery solutions providing the end user with ROI.

## Our expertise in...

- 1 Water quality specification & level of equipment protection
- 2 Energy/Power requirement per m<sup>3</sup> of treated water
- 3 Waste stream volume per m<sup>3</sup> of treated water
- 4 Waste stream quality and any local/regional discharge restrictions
- 5 Consumables/level of operation
- 6 Water re-use potential

allows us to provide a solution to close the cooling water system and attain ZLD for the end user.

### We have undertaken projects for:

Equinix, Global Switch, Digital Realty & Amazon
