

ENERGY Policy Statement

Electrical & Pump Services Ltd. Design, Supply, Manufacture, and Install Water and Wastewater Pumping and Treatment Plants and provide Operate, Maintenance, Short and Long-Term Contracts thereafter. We will integrate our energy objectives with our Environment, Health, Safety, Quality and Cost objectives to improve the competitiveness of the company and to minimise the environmental impact of our energy usage.

The organisation recognises its responsibilities to its staff, customers, contractors, and the general public and is committed to the continual improvement of energy performance and the energy management system. To this end, it maintains a documented Management System which conforms to ISO50001:2018 and shall take into account all regulatory and legislative requirements pertinent to its sector, local operating environment, and customer requirement.

The organisation's objectives include the following: -

- › Ensure that our energy policy is communicated to all employees and contractors and is made available to the public.
- › Ensure that information relating to the energy management system is available and accessible.
- › Promoting the concept of energy efficiency at all levels in the business.
- › Commit to continuous improvement in energy efficiency and investigation of alternative and renewable energy sources of energy at all levels of the organisation.
- › Identify the Significant Energy Users – the equipment and processes which account for the greatest energy usage or which offer the most potential for energy savings.
- › Establish and achieve performance targets for energy efficiency and regularly assessing whether the objectives and targets are being met.
- › Providing the necessary resources and framework to implement, review and achieve objectives and targets.
- › Ensure procurement, design, operating, and maintenance procedures consider energy performance improvement.
- › Communicate with employees, communities, businesses and government to achieve better understanding of energy issues.
- › Comply with relevant legislation, legal and other requirements, that relate to the energy efficiency, energy use and energy consumption.

The above policy is supported by the Management of the Board of Directors of EPS who shall commit the necessary information and resources in ensuring that the objectives and targets can be achieved. These objectives and targets will be reviewed and updated at least once per year.
