

EPS has been designing, installing, commissioning, and servicing water and wastewater assets for over 55 years.

Our dedicated Service and Repair division ensures seamless support, providing 24/7 nationwide coverage with unmatched response times. Supported by a skilled team of 80 professionals and an efficient Fleet Management system, we deliver reliable solutions.

Explore our modern repair and equipment overhaul centers in Mallow and Ballyhaunis, along with a dedicated pump testing facility capable of 6" and 8" pump testing and validation in-house.

Benefit from our in-house pump building capability up to 150kW, ensuring swift turnaround, typically within 1-2 days.

Health & Safety

EPS service and maintenance training also goes beyond our technicians. We ensure that site and regional managers have the specialist skills and capabilities to guarantee both results and a 'safety-first' policy.

Our technicians operate under the strictest safety-first standards, something we are proud to never compromise on.
