

# SNUG 355L

Designed with understairs applications in mind

While the Multiboost Snug was originally designed with understairs applications in mind, it is suitable for many types of premises - from bungalows to B&Bs, with low water pressure and flow and where space is limited. This versatile system which comes in 1 to 2 pump options offers duty/assist and duty/standby. The system can also be adapted to include the EPS Viqua Integrated UV board, which facilitates UV disinfection of the water supply.

The design of the unit enables the installer/end user to maximise available space, while inclusion of a removable pump on lid allows for easy installation, access and maintenance.

## KEY FEATURES

- Non-corrosive holding tank (WRAS approved material)
- Pre-fitted fill valve and overflow
- Minimal installation requirement
- Built-in electronic start/stop controller
- Dry-run protection with auto restart (time delay)
- Equipped with drain off/gravity feed connect option
- Removable pump pot system
- Optional twin pump system
- Designed for understairs applications
- Drip tray, insulation jacket and anti-vibration mat available on request

Note: Images are for illustration purposes only. Volumes of tank may vary slightly depending on seasonal temperature during the manufacturing process. Positioning of ballcock and overflow can increase/decrease working capacities. Drip trays, installation jackets and anti-vibration mats available for all models.
